## Prescription/Referral Form

Luke Stikeleather, CO, serves patients at both his Fairfax and Baltimore locations. In 2004, Luke became the first orthotist to introduce the Rigo Cheneau brace to North America and he has been using this brace for his patients ever since—making adjustments as technology has advanced and continuing his research on best methods of treatment. He has treated patients with scoliosis and spinal conditions for over 30 years.

### EOS Low Dose Radiation X-ray Imaging

National Scoliosis Center is one of the first to offer this technology to the Baltimore-Washington, DC area. With EOS imaging, we can provide high quality images with 50-80% less radiation than a standard X-ray.

### Please bring the following to your next appointment (or send ahead):

- Your most recent X-ray
- Clinical notes from your last orthopedic specialist visit
- Letter of Medical Necessity (LMN)
- This form or DME order

Other \_\_\_\_\_

*The EOS provides ultra-low dose radiation; the X-rays are read by a board certified radiologist and/or a pediatric radiologist. When you leave your appointment, you will receive a printed copy of your X-ray as well as a CD with the image. Your report from the radiologist will be faxed to your referring physician.*

### Bracing

- TLSO/Rigo Cheneau Brace
- Night Time/Rigo Cheneau Brace
